

easyFBT – Fringe Benefits Tax Solution

Want to be able to spend more of your valuable time getting on with your core business?

Download and take your no-obligation free trial today to find out how your business can benefit from using easyFBT to manage your Fringe Benefits Tax compliance.

Installation

easyFBT has been designed to be quick and easy to install with minimal (if any) input required by your IT Department. No need to install complex database servers or seek on-going administration support or maintenance.

Import Data

Import your benefit information directly from either Microsoft Excel workbooks, tab-delimited or comma separated text files using our specially designed wizard to guide you through this complex process of adding new benefit data or updating existing benefits with new information.

Attachments

Wanting to keep all your documents and records as part of your return? easyFBT allows you to store this information on an entity-by-entity basis via our Attachments feature.

Entity Consolidation

The consolidation feature allows you to aggregate any number of entities into a single entity for reporting purposes. An easy to use wizard guides you through selecting the required entities, collecting some information about consolidation and finalising the aggregation.

Reporting

The Reporting Manager allows you to create, manage and produce printed reports across various areas for review and record-keeping purposes. easyFBT comes standard with over 100 built-in reports for your standard business and employee reporting obligations.

On-Screen Reporting

Built-in on-screen validation, reconciliation and review reporting provides you with an easy way to review your return. Each report can be searched to show individual employees benefits and by double-clicking on a row you can drill-down to that benefit row back in the benefit workpaper.

RFBA Employee Letters

Generating letters for you employees used to be a time consuming task. Spend a couple of minutes configuring the Documents and Letters wizard and the hard work will be taken care of by easyFBT.

Automated In-House Benefit Allocation

The In-House Benefit Reduction Allocation wizard automatically allocates the \$1,000 In-House Benefit Reduction amount for in-house benefits to your employees based on your selection of workpapers and order of allocation.

Why easyFBT?

easyFBT is for businesses who have struggled in the past justifying spending thousands of dollars on software to complete their returns or those of you who find your return is just too big for the simple Microsoft Excel based products and instead turn to building and maintaining your own complex workbooks. Compliance can be a costly and time-consuming process and easyFBT can assist you to reduce this burden.

The program has been designed from the ground up using a step-by-step, easy to use process flow, with a fully customisable docking and document layout system. A number of built-in wizards guide you through some of the more complex features such as importing benefit data to designing custom reports.

easyFBT facilitates the entry of your benefits in a number of ways from manual entry, pasting and a wizard-driven data import process. Once entry is complete, a number of validations, reconciliations and reviews can be undertaken to ensure that you have complied with your obligations. From there you can produce some reports outlining your FBT obligations and your employees' Reportable Fringe Benefits amounts.

Once your return has been completed, easyFBT will generate the Australian Taxation Office (ATO) registered FBT return form which can be printed, signed and then lodged directly with the ATO.

What our clients are saying

Our clients love using easyFBT, this is just some of their feedback:

easyFBT is user-friendly, accurate and quick to use with a great reporting system. It is by far the best FBT software package I have come across and the customer support was outstanding. On the rare occasion I needed support, my problem was resolved in minutes.

- Survey feedback, Large Corporate, VIC

As a firm of Chartered Accountants, easyFBT saved us many hours compared to using spreadsheets to handle our FBT calculations.

- Michael, Chartered Accountants, NSW

easyFBT has made my job much easier to prepare the annual FBT Return. It was definitely the best move to start using your software three years ago.

- Tania, Large Corporate, VIC
